Professional Activities and Service

National Service: Member of OSAC Firearms and Toolmark Subcommittee: To ensure the highest quality standards are available to the forensic science community, OSAC has a process for performing independent scientific and technical reviews (STR) of draft “proposed” standards. The goal of the STR is to help strengthen a draft before it leaves OSAC and goes to a standards developing organization (SDO). This is accomplished by having STR participants review the draft standard and provide feedback, in the form of comments, to the drafting subcommittee to help enhance the standard’s scientific merit, usability, and clarity.
